## Electives offer students important opportunities to exercise strong habits of mind

- Habits of Mind: The thinking skills that people use when confronted with problems , the resolutions of which are not immediately apparent.
- Discoveries are frequent in the electives as students apply knowledge as it is learned by making something novel. These discoveries lead to actions that when understood and examined develop creative and critical thinking skills.
- Strong habits of mind are what lead to creative, imaginative, and innovative ideas.

**BHS Graduation Requirements include 3 electives credits**

**Students may choose to fulfill this requirement in two ways**

- A combination of credits from all three disciplines
  - Three credits in one discipline.
- A pathway option is available for students seeking to study intensively in the elective areas
